City of Allentown Map Viewer

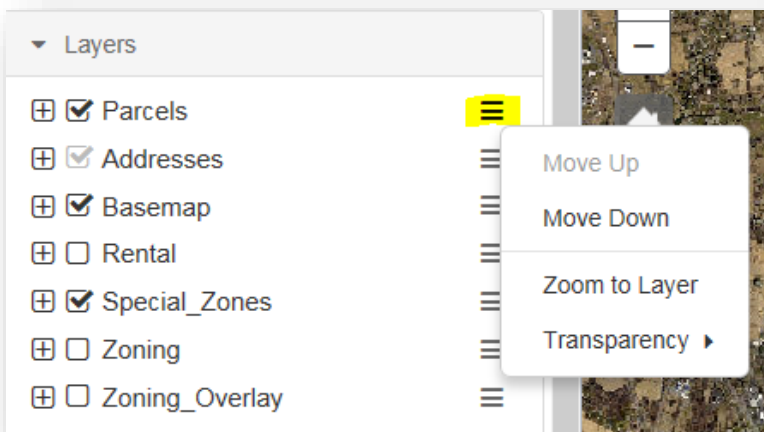

Legend

Legend display the way the layer appears on the map.

Layers

Layers gives you the ability to turn layers off/on by toggling the check box next to the layer name.

By clicking on the symbol highlighted below you are given the ability to move layers up/down, zoom to the layer and adjust transparency of the layer.

Bookmarks

Bookmarks allows you to save a location to refer to later. City Hall is saved by default in the list. When you click on the bookmark the map will zoom to that extent. You can use the pencil to edit the bookmark, use the x to delete the bookmark or click on Add Bookmark to create a new bookmark.
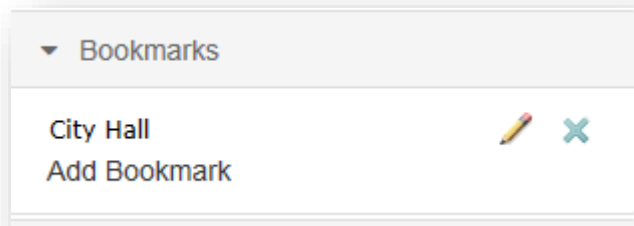

Identify

Allows you to choose to Identify on All Visible Layers or to choose the layer to identify on. If a layer is not visible in the map identify will not work for it.
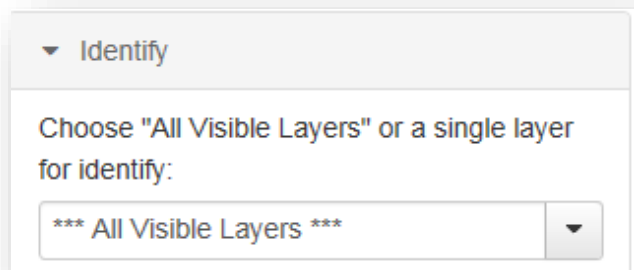

When you click on the map the Identify box will show. The highlighted arrow below will change the identify results to each layer that was identified.

## Draw

Draw enables you to add graphics and text on the map. These graphics and text will show on any prints created.
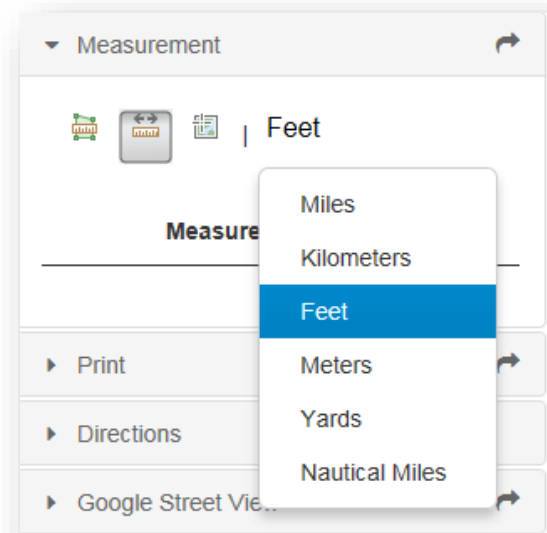

Draw

Enter Text
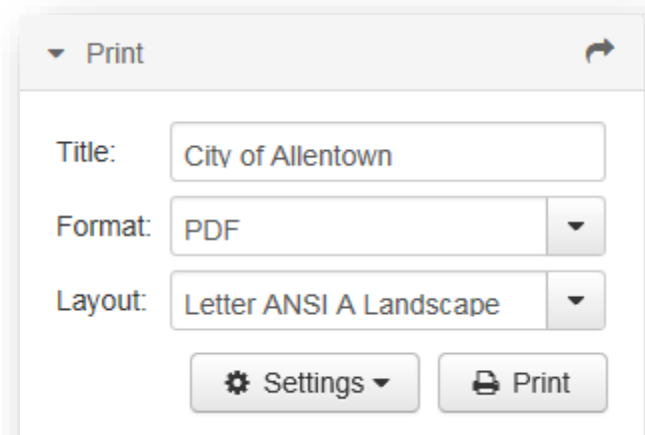

Text

Current draw mode: None

Measurement

Measurement enables you to take measurement on the map. Units can also be changed as needed.

Print

Print gives you the option to put a title on the map, change the format of the output, and change the page layout.
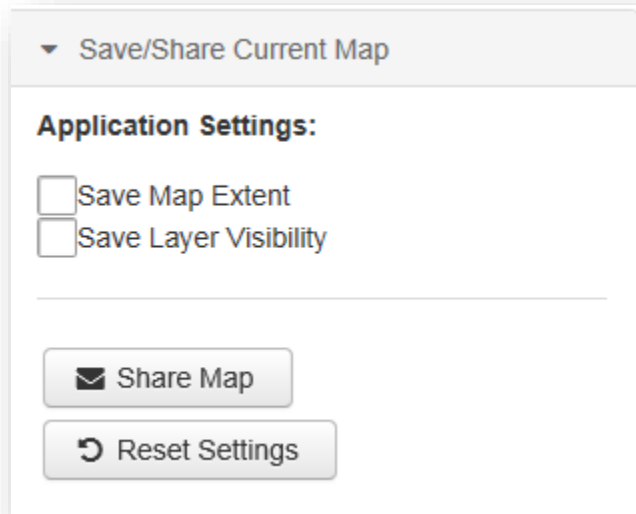

Directions

Google Street View

Click on Activate with map click and the window will open showing Google Street View for the location.
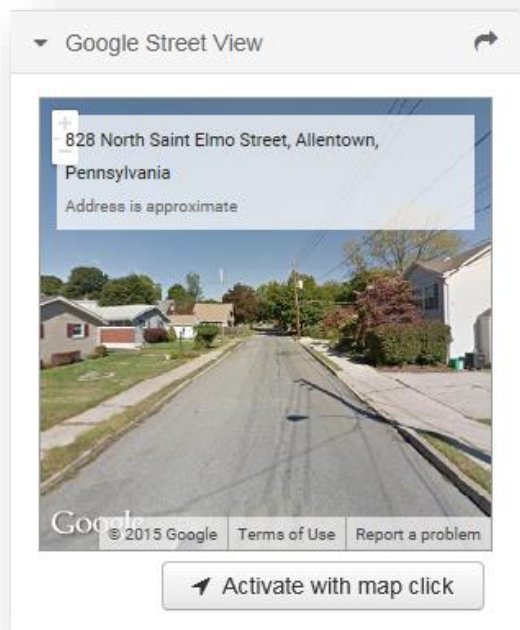

Street view of the location can also be activated by right clicking on the map and choosing 'Street View Here'

Save/Share Current Map

This function allows you to save the map on your computer with your preference for layers that are checked on or off and the basemap you prefer. Each time you open the map viewer your choice of layers and basemap will be shown.
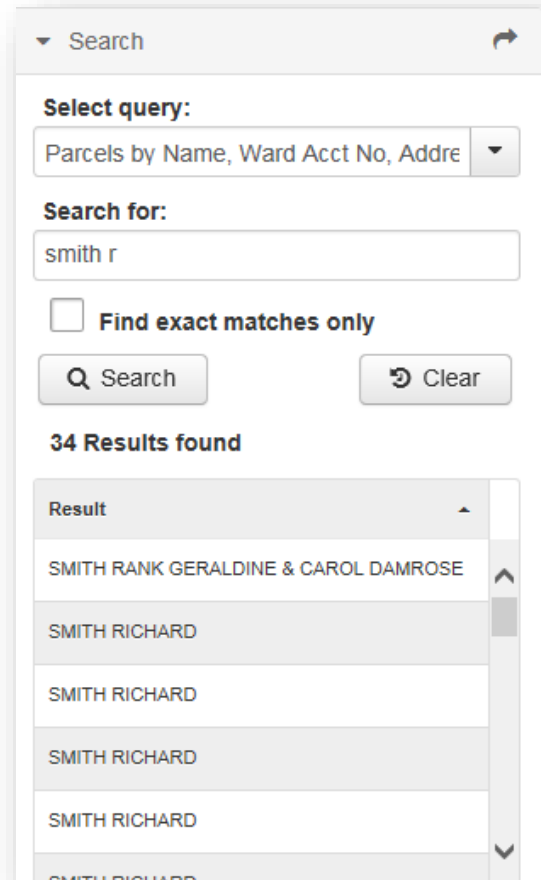

Search

Search enables you to search by Property Owner Name, Ward Account Number or Address. The parcel results will be highlighted on the map. When you click a result in the grid below the map will zoom to that parcel.

When you search by address, you are searching the parcel address here. Only exact matches will show. If you are not sure of the exact deeded address of the parcel it is best to use the address search located at the top of the page, as shown below.

Basemaps

Basemaps gives you the ability to change your basemap layer.
